Re: Case #2013-00332

RECEIVED  
OCT 10 2013  
PUBLIC SERVICE  
COMMISSION

Dear Mr. Derouen,

As a resident of Old Bridge Subdivision in Danville Ky., please let this letter serve as my objection to the request of AmeriGas to discontinue their bulk service to our neighborhood.

The system they have in place has served us well from its inception. When the subdivision was originally developed, a bulk system was installed to avoid having numerous fuel tanks scattered about the neighborhood. In fact, we have **deed restrictions** forbidding fuel tanks above or below ground. The original propane provider went to great expense to install this system, and the property owners have upheld their end of the agreement by using the system in place.

I don't think AmeriGas has considered the long range outcome of their request. I would venture to say if they are successful, that every property owner that must install a tank, will use anybody **except** AmeriGas, out of spite. Additionally, older homes that have systems to be replaced in the coming years, will likely convert to electricity to avoid installing a tank.

Also, every home here has a septic system. Trying to bury tanks on these properties will provide many challenges.

As the **Public** Service Commission, I hope you will give due consideration to our request to deny AmeriGas their request, and prevent us from having to deal with all of the issues that would occur.

Sincerely yours,

Ed Ensslin

201 Old Bridge Rd.

Danville, KY 40422

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for consistent and reliable data collection processes to support informed decision-making.

3. The third part of the document focuses on the role of technology in data management and analysis. It discusses how modern software solutions can streamline data collection, storage, and reporting, thereby improving efficiency and accuracy.

4. The fourth part of the document addresses the challenges associated with data management, such as data quality, security, and privacy. It provides strategies to mitigate these risks and ensure that data is used responsibly and ethically.

5. The fifth part of the document discusses the importance of data governance and the role of leadership in establishing a strong data culture. It emphasizes that data should be used to drive strategic initiatives and improve organizational performance.

6. The sixth part of the document provides a summary of the key findings and recommendations. It reiterates the importance of data in driving organizational success and provides actionable steps for implementing the discussed strategies.

7. The seventh part of the document includes a list of references and resources used in the research. It provides a comprehensive overview of the current state of data management and analysis in the industry.

8. The eighth part of the document contains a list of appendices, including detailed data tables, charts, and additional information that supports the main text. These appendices provide a more in-depth look at the data and analysis presented.

9. The ninth part of the document includes a list of footnotes and endnotes, providing additional context and clarification for the information presented in the main text. These notes are essential for understanding the nuances of the data and analysis.

10. The tenth part of the document is a concluding statement that summarizes the overall findings and reiterates the importance of data in driving organizational success. It serves as a final call to action for the organization to embrace data-driven decision-making.
